

HAMZA ALI

GenAI / AI-ML Engineer | Lahore, Pakistan | hamza1713@gmail.com

GitHub: github.com/hamza1713 | LinkedIn: linkedin.com/in/hamza-ali-b9b8b22a6

PROFESSIONAL SUMMARY

GenAI engineer specializing in RAG systems, agentic workflows, LLM evaluation, and production AI. Experienced in designing secure role-based access controls and resilient fallback architectures.

CORE TECHNICAL SKILLS

Languages & Frameworks: Python, FastAPI, React 19, TypeScript, PyTorch, LangChain, CrewAI
AI/ML & Databases: Gemini, ChromaDB, DuckDB, RAGAS, Docker, Azure ML, SQL, MySQL

FEATURED PROJECTS

FinSight - Enterprise AI Workspace

- Built dual-engine RAG and Text-to-SQL system with 6 protected roles and department isolation.
- Automated quality and security test suite using RAGAS with 34 comprehensive evaluation checks.
- Tech Stack: FastAPI, React 19, ChromaDB, DuckDB, RAGAS, Docker Compose.

Factscope AI - Claim Verification Platform

- Developed news claim-verification pipeline with 3-tier fallback engine (Gemini, Search, Cache).
- Shipped dual web and desktop (Electron) surfaces with 24h response caching and confidence scoring.
- Tech Stack: Gemini, Google Search API, Electron, Express, Serverless.

EXPERIENCE & EDUCATION

Data Science Intern - Advanced Telecom Services (ATS AI Lab) | 2024

- Analyzed ~1,000,000 NOAA lightning-strike records for feature engineering and predictive modeling.

BS Computer Science - Abbottabad University of Science and Technology | Graduated 2026
